

# NUTRI-Mins

GENERAL PURPOSE

Livestock grazing pasture and fodder crops are often deficient in the essential vitamins and minerals required to optimise growth, performance, reproduction and maintenance.

NUTRI-Mins General Purpose is a balanced formulation of essential minerals, trace elements and vitamins that provides the animals with the daily levels required to maintain health and maximise productivity.

NUTRI-Mins General Purpose is a waterproofed, loose lick for all weather use and is presented in a consistent granular form that is molassed to optimise intake.

## Nutritional Analysis

DM Basis

Vitamin A	MIU	0.250
Vitamin D	MIU	0.050
Vitamin E	G/Kg	0.750
Cobalt	G/Kg	0.05
Iodine	G/Kg	0.02
Selenium	G/Kg	0.005
Copper	G/Kg	0.000
Potassium	%	0.1
Magnesium	%	4.5
Manganese	G/Kg	2.75
Sulphur	%	0.2
Zinc	G/Kg	2
Salt	%	35
Phosphorus	%	2
Calcium	%	21

Store product in a cool, dry place.

BAG

### RATE OF USE

**SHEEP** 10-30 GRAMS  
/HEAD/DAY

**CATTLE** 40-100 GRAMS  
/HEAD/DAY

### DIRECTIONS

OFFER AD LIB IN  
WELL DRAINED FEED  
POINTS

#### Why supplement grazing livestock?

Vitamin and mineral supplementation can correct subclinical cases of nutritional deficiency, which can have a greater economic impact than clinical cases of deficiency. Supplementation benefits immune function, reproduction rates, rumen function, feed conversion efficiency, average daily gain and therefore improve production.

#### Why use a granular loose lick?

Animals have greater access due to increased surface area with the loose lick ensuring that every animal can easily access the supplement. It is also easier to consume as there is no licking a hard block and animals do not forfeit vital grazing time.

#### What happens if NUTRI-Mins General Purpose gets wet?

All of the products in the NUTRI-Mins range are protected with a weather proofing agent, so water will run off and not dissolve the product, provided the feed points are well drained. No shelter is required for the product to be used all year round.

#### What type of feed points should be used?

Dedicated troughs can be used where available, however any well anchored feed points can be used. A practical and low cost option would be to use the top or bottom third of a 205 litre drum.

#### How many feed points are required?

Allow one feed point per 25 head of cattle and for every 50 head of sheep. Place feed points away from water sources but in positions frequented by the animals.

#### Can NUTRI-Mins General Purpose be fed all year round?

YES, NUTRI-Mins GP can be fed at any time of the year and at any stage of production. However at certain times, such as lambing and/or calving, or when stock are on dry pasture, more specific supplementation can better meet the changing nutrient requirements of the animal. We suggest contacting your local AAN representative to discuss targeted supplementation options.

#### Can anything else be added?

Approved ionophores such as Monensin or Lasalocid sodium (Bovatec®) and sources of organic zinc (Zinmet®) can be included into the products upon request. Custom blending to meet specific vitamin and mineral requirements can be arranged.
